GREEN COMMUNITIES ARBOR INITIATIVES: SAMORA MACHEL AND DELFT

Dear Carl

Green Communities thanks you once again for your generous donation to our Arbor Week initiatives.

We collected the trees 6 September 2010 and they were distributed to 3 schools in Wesbank, Delft as well as 5 schools and 2 educare centres in Samora Machel, Philippi. We partnered with SAEP on the Samora Machel initiative whereby they hosted environmental information sessions with the learners to coincide with the planting of the trees.

Not too long after, interns from the City of Cape Town's Environmental Resource Management department visited Samora Machel and volunteered their time in the planting of the trees at the two educare centres.

Learners from the schools in Wesbank, Delft were thoroughly excited to be a part of the Arbor event and learnt quite a bit about the significance of keeping our environment healthy and green. With the assistance of the learners and a few staff members, we planted 5 trees at each school and conducted an information session pertaining to '*Trees of the Year*' and '*How to plant a tree and nurture its growth*'.

It was a wonderful experience for all, and we thank you for assisting us in making it possible.

Regards
